

1994 FEDERAL DISTRICT PATIENT CARE COMPETITIONSINDIVIDUAL SCENARIO

While on duty a Super Ex, you were sent over to the post at the Civic Center to replenish some supplies. On your way back, a carny approaches you and tells you that a worker has fallen and hurt him/herself. They are unable to give you any other details.. You are alone but you do have a radio with you. Treat the casualty as you find them.

GOOD LUCK!

CASUALTY INFORMATION

You are a 23 year old adult who was working on a concession, who tripped on a steel peg supporting an awning over your concession. You've impaled your chest on the left side but immediately pulled back, pulling the peg out of your chest. You then called out for help. You are conscious but groggy. You will have great chest pain. You have no allergies, no medications and you've just recently been diagnosed with Hepatitis B. You also have a minor scrape to your left palm.

SIMULATOR'S INFORMATION

Sucking chest wound - left side - $\frac{1}{4}$ " in diameter- bruising
Frothy blood from wound and from mouth
Skin is flushed
Left palm - minor scrape with small bits of gravel/sand - moderate
bleeding
Casualty will be lying on his right side.

JUDGE'S INFORMATION
